

McKinsey & Company has set the standards of excellence in top management consulting for more than 80 years. We advise decision makers in leading companies, the public sector, non-profit organizations, and innovative, fast-growing start-ups around the globe. In Germany alone, about 2,000 employees are dedicated to fulfilling our mission: to help clients achieve substantial and lasting improvements in their performance.

McKinsey's Basic Materials Practice develops solutions with clients in all the industry's sectors and subsectors and helps implement them. The focus areas of the Practice are: metals, mining, and forestry products. We additionally invest heavily in developing state-of-the-art knowledge to make our clients more successful. The Metals & Mining Sector of our Basic Materials Practice is supported by a center of competence staffed by experts in various locations worldwide. To strengthen our teams in Dusseldorf, Louvain-Le-Neuve (Belgium), Johannesburg, São Paulo, and Shanghai, we are currently seeking a creative and energetic

Research Analyst Mining

Your role:

Together with your research colleagues from around the world, you will work with McKinsey consultants to:

- Prepare analysis on the latest developments in the industry and present the findings in McKinsey format
- Conduct research in response to specific requests (collect, summarize, analyze, and synthesize relevant data and information)
- Continue to build knowledge of the global metals and mining sectors, as well as to identify, review, and maintain information sources and databases
- With increasing industry experience, you are encouraged to develop into a true thought partner for our consultants and build up knowledge spikes in specific areas as well as industry perspectives

We expect that you will also contribute to building the Basic Materials Practice by participating in the professional development of colleagues, helping design and deliver training programs, and finding new ways to create innovative and distinctive services, as well as to enhance team spirit.

Your contact:

Elena Shvartsman, McKinsey & Company, Kennedydamm 24, 40027 Dusseldorf, Germany
E-mail: Basic_Materials_Recruiting@mckinsey.com

Your profile:

The ideal candidate should have a strong interest in the mining industry and be willing to quickly gain deep industry knowledge. We are looking for a highly inquisitive and creative individual who is excited about working in a cross-cultural environment.

We would expect:

- Doctoral or Master's degree and an outstanding academic record, preferably in mining engineering or geology
- Some relevant work experience or internships
- An interest in and some understanding of economic, financial, and general business concepts and terminology
- Superior problem-solving, analytical, and quantitative skills
- Excellent written and verbal communication skills
- Strong multitasking abilities
- Professional attitude and service orientation; superb team player

At McKinsey & Company, you will work on stimulating professional challenges with dedicated teams. In addition to a competitive salary and an attractive benefits package, we offer many opportunities for personal and professional development.
